

# Bryn Solution Seeker

Jenny is going on holiday. Her neighbour Pete has offered to look after her two dogs.

Every day, each dog eats  $\frac{3}{4}$  tin of dog food and 250g of mixer.

- How much dog food and mixer should Jenny tell Pete to buy to feed the dogs for **2 weeks**?
- How much **money** should Jenny give Pete to buy the food?

- How will I structure my answer?
- How will I display my answer

## Communicate

## Identify

- What is the key information?
- What do I need to find out?
- What method/maths do I use?

## Review

- Have I answered the question?
- Have I checked my work?
