

Class Charts Wellbeing Module

Students and parents/carers are able to use the Class Charts app to indicate a current rating for wellbeing, as shown below. As you can see, they are also able to give further information if they want to:

The interface displays a wellbeing rating scale with five options: Struggling (blue sad face), Feeling Low (blue sad face), Ok (grey neutral face), Positive (green happy face), and Fantastic (green happy face). Above the scale are three tabs: Positive (green), Negative (red), and Wellbeing (blue). To the right are three more tabs: ALN (red), Safeguarding (red), and Notes (red). Below the scale is a text input field labeled 'Add note (optional)' with a dropdown menu open showing options: -- none --, Anxiety, Confidence, Exam Stress, Friendship issues, Issues at home, and Motivation. Below the note field is a 'Timestamp:' field showing '13/4/2021 11:52' and a 'Save' button.

At Bryn, the Class Charts Wellbeing Module will be used for two principal functions:

Function One: Emergency Alerts

The system can be used at any time by students and parents/carers to alert staff to a wellbeing issue. These alerts will be **actioned by members of the Well-being Team as soon as possible**.

Function Two: Bi-weekly Whole School Check-Ins

On Tuesdays and Thursdays, all students will check in with their Wellbeing rating by 9am.

When students indicate that they are 'Struggling' or 'Feeling Low':

- Initial responders will make contact with the student by 11.20am to gain more information.
- Urgent concerns will then be referred to the SMT Link and will be followed up within the day.
- Non urgent concerns will be referred to the HoL who will follow up within 72 hours.
- Brief notes should be added to the wellbeing entry to log what action has been taken.

Teachers are able to log a wellbeing rating on behalf of a pupil. We have not yet enabled parents to make log entries. The Wellbeing Team will have access to track pupils' wellbeing data in order to monitor and identify trends.
